

Japan-Spain Joint Workshop on Nanomedicine Research

IMDEA Nanociencia had the pleasure to host a delegation from Japan of leading scientists in the area of nanomedicine as part of the Japan-Spain Joint Workshop on Nanomedicine Research. The Japanese delegation, from the Universities of Keio, Kyoto, Gunma, Tokyo Medical, Osaka, and Tokyo Electro-Communications and delegates from Spain (CSIC, ISC III, CIBER-BBN, IBEC, IDIS-CIMUS, HGUGM, BIONAND, IMDEA Nano) met as part of the event organised jointly by the Japanese Embassy of Spain, AMED (Japan Agency for Medical Research and Development), and MINECO.

The visit to IMDEA Nanociencia started with a presentation of the institute given by Prof Julio Camarero (Deputy Director for Scientific Strategy) followed by a tour of the facilities of the institute focusing on IMDEA's strengths in nanomedicine. The visit ended with an informal lunch which involved scientific discussion with the scientists from IMDEA working in the Nanomedicine research line. The aim of the visit was to bring together Japanese and Spanish experts in nanomedicine in order to explore possibilities of collaboration.
